SUMMARY

Senior Frontend Engineer with 4+ years building web products with React, Next.js and TypeScript, backed by solid full stack experience with Node.js. I have shipped SaaS products, dashboards, real-time features and high-traffic platforms across fintech, healthtech and sports, and I founded Feedget, a feedback platform I build and run end to end. Open to remote full-time and contract roles.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, React Query, Zustand, Redux, React Hook Form, Zod, Storybook, Vitest, React Native

Backend: Node.js, NestJS, Fastify, Express, Prisma, TypeORM, REST, GraphQL, WebSockets, Python (FastAPI)

Data & Infra: PostgreSQL, MySQL, MongoDB, Supabase, Redis, Docker, AWS (S3, CloudFront, Route 53), CI/CD

AI: LangChain, LangGraph, LLM integrations

EXPERIENCE

Founder & Lead Engineer — Feedget

May 2023 – Present

Self-employed · Feedback platform: embeddable widget for SaaS and WhatsApp/QR Code surveys for service businesses

- Built the product end to end: Next.js dashboard, Fastify API, Prisma, PostgreSQL and Redis.
- Designed and shipped a framework-agnostic feedback widget published on npm (React, Next.js, Vue, Angular, Astro, plain JS).
- Implemented AI triage that classifies feedback by urgency, sentiment and category and detects duplicates.
- Built integrations with Slack, Discord, Telegram and Trello, and public roadmaps on custom subdomains.
- Own product decisions, pricing and go-to-market, balancing time-to-market, tech debt and operating cost.

Technical Lead — OfficeCom Brasil

Jul 2025 – Jun 2026

Technical Lead (Aug 2025 – Jun 2026) · Software Engineer (Jul – Aug 2025) · High-traffic sports platform (CerteiroFC)

- Led frontend development of the backoffice and the CerteiroFC app with React, Next.js and TypeScript.
- Built features designed for performance and stability under peak concurrent usage.
- Set component architecture and code standards that made the codebase easier to maintain and extend.
- Contributed to the Laravel backend (APIs and business rules) and coordinated frontend-backend integration.

Senior Software Engineer — Ego Eimi

May 2024 – Jul 2025

Senior Software Engineer (Nov 2024 – Jul 2025) · Mid-level Software Engineer (May – Nov 2024)

- Led frontend development with Next.js, TypeScript, Tailwind CSS, shadcn/ui and Storybook, with Vitest unit tests and React end-to-end tests.
- Cut interface load time by 35% through code splitting, caching and rendering optimizations.
- Built real-time features with WebSockets, React Query and Zustand, and GraphQL APIs with NestJS, Fastify and Prisma.
- Built AI automations with Python, FastAPI, LangChain and LangGraph, delivering agent proofs of concept in about four weeks each.
- Applied Clean Architecture and DDD, migrated databases to Prisma and Supabase, and set up Docker-based CI/CD on AWS.

Mid-level Software Engineer — iTechMed

May 2023 – May 2024

Healthcare technology

- Built monitoring dashboards for payment gateways and critical healthcare operations with React, Redux, Zustand and TypeScript.
- Built backend services with Express, Fastify, TypeScript and MySQL, including secure authentication.
- Automated AWS deployments (S3, CloudFront, Route 53, Certificate Manager) with Docker, and integrated with Registro.br.
- Raised test coverage to 85%, reducing production failures.

Software Engineer — Cognum

Sep 2023 – Mar 2024

Contract · AI automation

- Designed AI automation platforms and conversational flows that replaced manual tasks.
- Shipped AI agents to production in roughly four-week cycles and mentored developers on architecture and code quality.

Frontend Developer — LAB510 Consultancy

May 2022 – Dec 2023

Software consultancy

- Built web platforms, dashboards and internal tools for multiple clients with React, Next.js and TypeScript.
- Improved performance, onboarding and conversion across client products using Tailwind CSS, Styled Components, Redux, Zustand and React Hook Form.
- Delivered e-commerce and backoffice solutions.

Full Stack Engineer — Independent

Sep 2021 – Jul 2025

Freelance · Web and mobile products for startups, companies and public institutions

- Virtual Pay: built the backend of a casino gaming SaaS with NestJS microservices, TypeORM and MySQL, and its Next.js frontend with the Compound Component pattern, React Query, Zustand, React Hook Form and Zod. Contributed to BizStore (Magento PWA, React) and to a payment gateway (Vue.js, Laravel).
- Public sector: transparency portals, a heritage registry, voting apps and a digital school records app (React Native, Expo).
- BI dashboards (SinteseBI, ComercialBI) and SaaS products such as a digital menu for restaurants (VaiAnotando), from MVP to production.

EDUCATION

B.S. in Information Systems — Universidade Estácio de Sá · 2022 – 2025

LANGUAGES

Portuguese (native) · English (professional working proficiency)
